

Site Benchmark Comparison Report

Use the *Site Benchmark Comparison Report* to analyze individual student growth over time based on *InSight* assessment results. This report displays data for each administration of *InSight*, and allows administrators to measure growth by comparing student proficiency levels between each administration, and by reviewing total level gain. Please note that students should complete a minimum of 40 - 60 *SeeReader* (SR) lessons before educators administer *InSight* as a benchmark assessment. By default, the *Site Benchmark Report* displays data only for students identified as "Ready" for *SeeReader* during initial *InSight* assessment.

View the total number of *SeeReader* lessons completed over the course of the implementation.

View the total number of *SeeReader* lessons completed between initial assessment (B1) and subsequent benchmark assessment (B2 or B3).
